MHub works on behalf of the North Africa Mixed Migration Task Force consisting of DRC, IOM, OHCHR, RMMS, UNHCR and UNODC. It promotes a human rights-based approach to ensuring the protection of people moving in mixed and complex flows to, through and from North Africa.

MHub produces knowledge on the human rights protection issues faced by people on the move in North Africa for use by policy makers, agencies, donors, public and academia, with a view to inform advocacy, policy and program development.

MHub fosters collaborative approaches among key stakeholders. Specifically, it holds the secretariat of the North Africa Mixed Migration Task Force.

Terminology: Throughout this bulletin the terms migrant, refugee and asylum seeker are used together to cover all those comprising the mixed migration flows (included in these complex population movements are refugees, asylum seekers, economic migrants and other migrants such as unaccompanied minors, environmental migrants, smuggled persons, victims of trafficking and stranded migrants, among others). This will be how mixed flows are referenced unless the source specifies the person(s) referenced is/ are of a specific category, in which case the relevant term will be clearly used.

Sources: Data is sourced from a wide variety of collaborators, partners, international and local organisations, media outlets and individuals in the region. The refugee agency – UNHCR – and migration agency – IOM are frequently the origin of specific refugee or migrant related data. MHub makes its own independent editorial decisions as to what sections and what data is included in this monthly update.
